

Geoff Bartholomew – Corporate Asset Management Specialist

Geoff has a breadth of business knowledge and experience, having been previously engaged in a range of senior management roles in large organisations and across varied industries.

While working in the Queensland Local Government sector, he has been a leading practitioner in the field of asset management, gaining extensive experience in operational, tactical and strategic asset management processes, practices and associated asset information systems.

Geoff holds a Bachelor Degree in Business (Management), along with Post Graduate Qualifications in Infrastructure Engineering & Management. During his career Geoff has also undertaken additional tertiary level studies and industry-based practical training in workplace industrial relations, human resource development and business process improvement.

Experience:

Geoff has worked for over 30 years in asset intensive industries including Rail and Local Government. Employed with QR for 20 years, he occupied various roles including Depot Operations Manager for QR's Brisbane locomotive maintenance facility and Service Delivery Manager within QR's extensive coal haulage business.

From 2000 to 2008 Geoff worked directly for Local Councils. Employed for 4 years as the Asset Systems Manager for Maroochy Shire he supervised and directed a specialist team responsible for capturing, maintaining and analysing asset data for Council's civil infrastructure, facilities, fleet, waste, open space and coastal assets. Under Geoff's guidance, the team developed appropriate asset hierarchies, introduced data capture tools and implemented a range of processes including valuation and maintenance scheduling/condition monitoring regimes using the IBM Maximo asset management and ESRI (GIS) information systems.

In 2005 Geoff moved on to the senior role of Asset Management Coordinator for Pine Rivers Shire Council, at the time the 5th largest Council in Australia. During this period he continued to successfully apply his business experience to support a growing emphasis on the cost-effective management of public assets. Since 2009 Geoff has worked as a self-employed independent consulting professional before establishing the new asset and data management consultancy business trading as LION SYSTEMS.
